FOR IMMEDIATE RELEASE

GFT LOWERS SPREADS ON INDEX CFDs

SYDNEY, AUSTRALIA, 1 June 2008 — GFT, worldwide leaders in online trading, has announced that the company has reduced prices on some of its most popular CFD markets. GFT customers can now trade three of the most widely traded cash share indices with just one-point spreads.

With the U.K. FTSE, German DAX and French CAC now quoted at one point, traders will find more value when trading CFDs with GFT. The ability to trade the most popular European indices for just one point gives GFT customers a major trading advantage.

"This follows our introduction of spot forex spreads as low as one pip, and helps us further our goal of providing our customers with the ideal combination of value, service and support," said Gary Tilkin, CEO and president, GFT.

Traders interested in speculating on share index prices will find many reasons to trade with GFT, including a wide range of indices from Australia 25 other countries, combined with competitive spreads and margin requirements as low as 0.5 percent. In addition, guaranteed stops are available on all indices (for an extra charge) and many indices are quoted 24 hours a day, 5.5 days a week – even when the underlying market is closed. GFT also offers CFDs on individual shares, commodities, bonds, interest rates and forex.

These three indices will be consistently quoted at one point during the peak trading hours of 8:05 to 16:30 London time. For full pricing details, view GFT's market information sheets at <http://www.gft.com.au/cfd/market-info.asp>.

About GFT

GFT provides service, support and award-winning trading technology through its DealBook® suite of trading platforms, which are designed for trading online spot foreign exchange trading and contracts for differences.
